THE OUTCROP.

Devoted to the Mining and Development of the Windermere and Golden Divisions of the District of North East Kootenay.

Book. IV., Chapter 3.

Wilmer, B. C., Thursday, June 13, 1903.

\$2.00 Per Year.

DISTRICT CROPPINGS

And Other Items of Interest in a General Way

Wilmer men are figuring on putting in a sawmill at Toly lakes.

Mr. and Mrs. J. L. McKay, of Sinclair, visited friends at Altahuer and Wilmer Sunday.

Magistrate Morgan, of Altahuer, is happy once more over the arrival of a big bonning by last Thursday.

Mrs. Wallace, a sister of Mr. F. Ball, arrived in Wilmer last week from Tacoma, and will remain here for sometime visiting relatives.

Eric Smith came down from the Prunigen Mines on Sunday. He reported that the bridge near the Bonlie post had been washed out.

Rev. Mr. Yates came up from Golden Friday and went up on the Prunigen to the head of the lake where he obtained a number of very nice views with his camera.

Alex. Ritchie, who has been manager at Pritchard ranch for several years, has decided to leave shortly for Great Slave Lake. He will be missed by a host of friends.

J. E. Griffith came up on the Prunigen Friday to Windermere and went on to Canal Flat to examine the Kootenay bridge, which was reported to have been moved six inches by the high water, but Mr. Griffith's return stated that the bridge had not moved any and that it is quite safe, although the earth has been washed away a little from round the piles, which cannot be repaired until the water goes down.

Frank Morgan took his first outing Saturday, being breaking his leg three weeks ago. Frank is quite contented to ride in a buggy now, and it will be some time before he will ride a bucking cayuse again.

The Mutual Life Insurance Company of New York is the strongest insurance company in the world. Rates of premium and full descriptions and explanations of all forms of policies can be obtained from W. P. Evans, Wilmer.

Old Man Simpson of the Cranbrook Herald has gone off on a holiday to the Coast, and evidently Peck McSain is handling the quill in his absence. It is Peck the railroader who may expect to be stirred up a few lines, and the Old Man will be in luck if he has less than six words in law. But Peck is all right.

Dave Bale came in from Fairmont on the stage Sunday, en route to the Prunigen Mines. "Dad" has not changed the slightest during his absence of about two years, and his many friends were all pleased to see him again. He says whenever he went to Tar Creek followed him and he never once failed to read it and learn all about the doings of his friends in this district.

S. Brewer came down from Fairmont Monday to attend the meeting of Upper House commissioners at Altahuer. He came down on the Prunigen in the evening and finally arranged to call a meeting of the executive committee of the Windermere District Liberal Association for July 1st. Mr. Brewer has just completed his assessment work on his Skelochonch creek mineral claims, which shows the body up even better than he had expected.

It has developed that Wilmer has several good songsters.

S. Mills came up from Golden Monday to take charge of the Altahuer sawmill.

A. Hume returned last week from a business trip to Calgary and Edmonton.

A new species of "pinto" was reported in town last week. It is said to belong to the red-curtain sisterhood.

Rev. Mr. E. St. G. Smyth will conduct English church services in Wilmer on the first Sunday evening of each month. Mr. and Mrs. J. E. Griffith and children came up from Golden on the Prunigen Tuesday and intend spending a few days at Fairmont.

The Altahuer Sawmill is making every preparation to start operations at once, which is a good thing as timber is hard to get at present.

Notice.—The lake practice will be continued every Saturday on the Windermere range at 1:15 p.m. J. E. Stoddard, Sec-Treas.

A. K. Kirk, P.E.S., returned to Wilmer from Revelstoke on Friday. He is now busy engaged taking the sawmill apart, preparatory to moving it to Revelstoke.

Already over \$1,000 have been subscribed towards building a town hall in Wilmer. It is proposed to put up a hall worth \$2,000. A meeting of the shareholders is called for next Wednesday.

Don't be haphazard, but if you know any news concerning yourself or your friends send it to this office. Write on three sides of the paper if you like. No matter how crude, send as the news while it is hot.

Mr. McPherson will conduct services every Sunday in Windermere at 11 a.m. Altahuer at 3 p.m. and Wilmer at 7:30 p.m., excepting the first Sunday in each month, when he holds service at Altahuer.

The Wilmer Mercantile Company is the name of a firm who have decided to open a general store in Wilmer, and the first shipment of goods is expected to arrive here by the next boat. The new firm has secured the store building opposite the Post Office, which is now being remodelled and greatly improved in appearance.

MAN POOR MAN!

This is what a Georgia lady editor says about it:

"What is man? Man that is born of woman is small cabbage and is full of patch. Infidelity he is full of cold, parrotic and catnip tea, and in old age he is full of cow words and rheumatism. In his youth his maternal ancestor teach him across her knee and expose to him all the sympathy in his nature with the heel and of a slumped position the Post Office, which is now being remodelled and greatly improved in appearance. The Cavalry group consists of 240 men and has shipped 250 tons of silver and iron, taken out in the course of development work only. The development work consisted of No. 1 level, 204 feet of Indian shaft from surface on west No. 2 level, 999 feet driving, 353 feet cross-cutting, 100 feet; No. 4 level, 244 feet driving, 123 feet cross-cutting intermediate levels from bottom 520 feet. Total, 2,546 feet. A wagon road has been built from the mine to connect with the Taylor creek and a distance of about 84 miles. The property is being systematically developed; a contract has been let to haul about 1,000 tons of ore. It is expected to ship 1,000 tons of ore this winter.

A force of from 25 to 40 men has been continuously employed at the Prunigen Mines, known formerly as the McDaniel or Red Lake mine. During the past year work was mostly continued in the development of the Red Lake vein. The ore in this ledge is a high-grade gray iron associated with iron pyrites, lying between serpentine and quartzite formation. The development on the Red Lake consists, in addition to that of last year, of a 305-foot tunnel; 50-foot vein at level 701; long from the 60th level of the mine; No. 1 upraise, 115 feet from mouth of tunnel, 29 feet, connecting with the surface; level 120 feet long from the tunnel No. 1, 30 feet above the tunnel level; upraise No. 2, 220 feet from mouth of tunnel, 35 feet. Owing to the hardness of the rock, but they progress

WINDERMERE MINING DIVISION

Extracts Taken From Minister of Mines Annual Report for Last Year—Just Issued.

There has been increased activity in this Division the past year, but many properties are still lying idle, owing to the low price of lead and silver, which has naturally retarded the advent of fresh capital. However, the working mines, the construction of new buildings for their more convenient and efficient operation, the installation of a compressor plant and the building of roads and trails to facilitate transportation to the Columbia river, are undoubtedly encouraging, and next season several additional shipping properties will be added to the list.

The various mineral belts that extend from Tully creek to Salmon river on the eastern slope of the Rockies, have been partly completed with good results. The territory comprises an area about 14 miles in length and 25 miles in width, and while but a small portion of it has been carefully prospected, the ledge that has been discovered shows such strength and continuity that it is reasonable to suppose that, with diligent search, many more promising discoveries will be made.

Attention during the past few seasons was more especially confined to the Taylor creek, No. 2 and 3 levels, and the Taylor creek. The ledge in these localities have every appearance of permanence and strength; dykes can be traced for miles, and in places glacial action has stripped the veins, leaving large open holes uncovered. The carrying of the majority of these ledges is heavy iron sulphide, interspersed with masses of solid ore. The general character of these ore is lead sulphide, carrying considerable quantities of gray calcareous material, occasionally rich silver, and some rich samples have been obtained. The general average is moderate and the ore should be profitably shipped even with the present facilities. A section is on exhibition at the Wilmer office.

The Cavalry group consists of 240 men and has shipped 250 tons of silver and iron, taken out in the course of development work only. The development work consisted of No. 1 level, 204 feet of Indian shaft from surface on west No. 2 level, 999 feet driving, 353 feet cross-cutting, 100 feet; No. 4 level, 244 feet driving, 123 feet cross-cutting intermediate levels from bottom 520 feet. Total, 2,546 feet. A wagon road has been built from the mine to connect with the Taylor creek and a distance of about 84 miles. The property is being systematically developed; a contract has been let to haul about 1,000 tons of ore. It is expected to ship 1,000 tons of ore this winter.

A force of from 25 to 40 men has been continuously employed at the Prunigen Mines, known formerly as the McDaniel or Red Lake mine. During the past year work was mostly continued in the development of the Red Lake vein. The ore in this ledge is a high-grade gray iron associated with iron pyrites, lying between serpentine and quartzite formation. The development on the Red Lake consists, in addition to that of last year, of a 305-foot tunnel; 50-foot vein at level 701; long from the 60th level of the mine; No. 1 upraise, 115 feet from mouth of tunnel, 29 feet, connecting with the surface; level 120 feet long from the tunnel No. 1, 30 feet above the tunnel level; upraise No. 2, 220 feet from mouth of tunnel, 35 feet. Owing to the hardness of the rock, but they progress

There is a silver-lead mine owned association. That body, should some of the polished without delay a plan statement of the facts in the case so that there need be no longer any doubt as to the real cause of depression. When newspapers published in the heart of the silver-lead mining district declare that the real grievance of the mine operators is excessive smelter charges and an authoritative denial is made to the allegation it is only reasonable that eastern people should accept that statement in good faith. If the local smelters are doing what is right by the mine owners, the latter should say so in such a manner as would carry conviction. On the other

land if the mine owners have a grievance against the smelters, let them say so with equal clearness.—Nelson News.

MINING RECORDS

Below we publish the mining records as compiled from the books at the Windermere Recording office:

LOCATIONS.
May 31—Ola Plata No. 1, on Gopher creek, by H. L. Auer.
Ola Plata No. 2, on Gopher creek, by G. D. Dougherty and Wm. Haymore.

May 26—Application for placer mining lease on Friday creek, by Delphus Menard.

ASSESSMENTS.
May 23—Solik, by J. S. Young.
May 28—Silver Treasure and Big Jump, by W. Haymore et al.

Second Eddy, by D. R. McLean.
May 30—Bucayan, Dignam, Christian and Canale, \$200 on each, by D. M. Jackson.

TRANSFERS.
May 6—McPherson, to J. H. Sample, 1/2 interest in Bullion and 1/4 in Diamond Creek.

May 11—P. C. O'Leary, to D. M. Jackson, power of attorney to deliver Pass, Gray Morning, Monarch and Magistrate, Nov. 19, 1902.

May 13—R. B. Brace, to H. C. Hammett, Prunigen.

May 21—J. Burman notice to delinquent owner to return No. 1.
May 22—J. Taylor, to W. Taylor, 1/2 interest in Bantam.

June 4—R. B. Howell notice to delinquent owner to return No. 1 and O'Leary.

These have been "5¢ fine" notices" sent to delinquent owners for this year from this office.

TO A DEPARTED FRIEND
Royal friend, in calm and strong,
Most we part without a sigh?
Must we here upon this plain,
Wine thy spirit awakes so high?

Husband, father and friend beloved,
And at heart with grief and woe,
Alas with sorrow decked your bier,
Faded the parting with a tear.

May we hold in friendship's clasp,
Tender memory of the past;
Kindly accents still while here,
From thy thoughtless womanly sphere.

Parted our friendship on life's troubled sea,
Parted, dear Agnes, our friendship with thee.

Left is the casket, the jewel is gone;
Left is the spirit to help us along.

To earth with its sorrows, thy spirit at rest,
Waited away to the side of the best;
Away from this home of sorrows and care.

May from the young life you lately bear,
May thy friendship here be stamped,
May one life and action be,
Thoughtful Agnes, more like thee.

—W. G. B.
Salmon River, June 13, 1903.

Property which mining is worth investing in the Canadian Trust Insurance Co. Apply to W. P. Evans, agent.

Chas. Fulton started to walk to the Prunigen Mines Monday evening, but about four miles out discovered that a bear with two young cubs had taken him, and as Mr. Fulton was not prepared to argue the point with Mr. Bear, he returned to town.

He started out again next morning well loaded, and a man coming down the hill that afternoon stated he was a bear skin along the road and further down saw Mr. Fulton who had recovered from his fright and was enjoying a meal by the roadside.

IT IS NOT ON THE SQUARE

Indians Under the Game Laws in Territories, But Not Here

Notice is given in the Canada Gazette that under section 133 of the Indian Act and after the 1st day of July, A. D. 1903, the laws respecting game in force in the North-West Territories shall apply to the following Indians, in lands and squares:

Yellow Quill and Kinstinist, at Touchwood Hills.

Cote, Key and Keeseloochee, at Pelly, James Smith and Camberland, at Duck Lake.

Chippewyan, at Onion Lake, Alexander, Joseph and Paul, at Edmonton.

Wm. Watt, Potequaney, Mistawaks, Ahlaba-kooop, Koonenayot and Wah-pachan-Senay, at Carleton Place.

Saddle Lake, Blue Quill, James Neenoon and Moose Woods (Hony), at Saddle Lake.

Now, by the above it would appear that the Dominion Government has done for the Territories exactly what is refused British Columbia. And, why? To come closer home. The Indians east of the Rocky Mountains must now come under the Game Act and are not allowed to kill game in the season. While most of the Rocky Mountains Indians may slaughter all the game they like at any time. This is not "even" justice. Why should not the game in the Columbia Valley be protected, it is just across the range of mountains? What is still more aggravating is the fact that the Indians from the Territories come over the range in bands every year and after some hunting on their game slaughter them the cattle in a parkland. The Indians have all their plenty of cattle and none of them are poor. Therefore, there is no reason why our game should be exterminated, as they will be in a very few years, if something is not done immediately to stop the Indians.

This is not a subject that appeals only to sportsmen, but to one that should be looked upon from a financial point. In a very few years the government might have a large revenue from this source if our game was protected, and a wealthier class of tourists would be coming here, who, without doubt, would spend much money here, and some would be sure to invest capital in our mines.

It begins to look as though our local sports could not do better than should our men and their guns and hunt up big game politicians this fall to shoot at.

It pays to advertise in THE OUTCROP.

The election of school trustees takes place Saturday, June 27th.

R. A. Power has been appointed head agent on the Peterborough Lustrine Company, at Wilmer.

Moses, Thos. Starbird and F. Collett went to Golden Sunday and returned on Tuesday accompanied by Mrs. Louise, Mrs. Starbird and Master Starbird.

J. L. McKay yesterday purchased the house and range of the Altahuer sawmill and will intend it in the Altahuer sawmill at once, which will give the latter double the power it has at present.

A. B. McPherson, manager of the Imperial Bank, at Touchwood, arrived here by the Prunigen Friday. He intends spending a week in this district and will visit all places of interest. Yesterday he started up to the Prunigen Mines.

W. F. EVANS,

Publisher and Proprietor.

WILMER, B.C., THURSDAY, JUNE 18, 1903.

The annual report of the Minister of Mines of British Columbia for the year ending Dec. 31st has just reached this office, for which delay is attributed to the difficulty in obtaining statistical returns from a few of the mines.

Looking at the statistics of production during 1902 by themselves it would appear that no advance was made in the province by the mining industry during the year, the total value of the minerals produced having been but \$17,486,550, as compared with \$20,086,780 for 1901, as shown in the following table:

	1901.		1902.
Gold, placer, oz.	48,505	170,100	53,057
Gold, lode, oz.	210,384	4,348,003	236,401
Silver, oz.	5,151,333	2,881,745	3,917,917
Copper, lbs.	27,003,746	4,446,063	29,636,057
Lead, lbs.	51,582,906	2,002,733	22,536,381
Coal, long tons	1,460,331	4,380,993	1,297,294
Coke, long tons	127,081	635,403	128,015
Other materials		417,238	480,051
	\$20,086,780		\$17,486,550

This falling off in total value is disappointing when compared with the distinct advances made in each of the several previous years since 1898, as under:

Year.	Value.	
1898.	\$10,906,801	\$ 451,504 increase.
1899.	12,393,131	1,486,329 increase.
1900.	16,344,751	3,951,620 increase.
1901.	20,086,780	3,742,029 increase.
1902.	17,486,550	2,600,230 increase.

The decrease in total value of last year's production is largely due, the report states, to the lower market values of the various metals, for were the year's output calculated at the prices prevailing in 1901 it would be but \$965,000 instead of \$2,600,230 as shown above.

The tonnage of ore mined was, however, greater. In both placer and lode gold, in copper and in coke, there was last year an increase in the quantity produced, and the decrease in coal was comparatively small. There was, though, a large decrease in the production of silver, and a still larger shortage in lead. To this decrease in quantity, together with the considerable shrinkage in average values for the year is directly traceable the seeming retrograde movement in the mining industry of the province.

The tonnage of ore mined in the province was greater, amounting to 958,999 tons as against 920,416 tons mined in 1901, an increase of 8.6 per cent. This great increase is entirely due to Rossland and the Boundary, more particularly to the latter, in which district 521,402 tons of ore were mined and smelted.

The number of mines that shipped ore during the year was 124, and these together employed 3,345 men, 1,126 above ground and 2,219 below. The statistics of the non-producing mines are very incomplete, only 44, employing a total number of 342 men, having reported to the mines department.

The gross output of coal during the year was 1,541,626 tons, of which 244,232 tons were converted into coke. Of last year's total production 775,500 tons of coal and 38,780 tons of coke were exported to the United States.

The combined placer and lode gold output for the year maintained an increase, having reached a total value of \$5,961,409, the highest output ever made in the province, and an increase over the previous year of \$942,700.

The total amount of silver produced was 3,917,917 ounces, valued at \$1,941,328, a considerable decrease as compared with the previous year, but practically the same output in quantity as 1900. Of this total amount about 25 per cent was mined in association with copper, while the remaining 75 per cent was mainly derived from the silver-lode ores of the Shocan and East Kootenay.

The lead production was 22,536,381 pounds, or only about half that of the previous year, owing to the suspension of the lead mines. The production was, nevertheless, greater than that of 1899.

The output of copper was 29,636,057 pounds, an increase of 2,032,311 pounds or 7.1 per cent over that of the preceding year, but owing to the reduced price of this metal the value of the year's output was \$1,039,293 less

than that of 1901.

A good deal of iron was mined on the coast during the year, but the only shipments made were from Texada Island, from which some 6,190 tons of magnetic iron ore, running more than 50 per cent iron, were sent to the iron furnace at Irondale, Wash. From the iron mines at Cherry Creek, near Katloops, 3,727 tons of magnetite were shipped to Nelson, for use in the smelter there as a flux.

One on Wilmer--Channel Wanted.

The steady warm weather of the past week has rapidly raised the water in all the streams, and old-timers say the water is higher now in the Columbia river than it has been since the floods of 1894, although no serious damage has yet occurred, yet much inconvenience has resulted.

On Wednesday morning the steamer Ptarmigan took all the passengers and freight for Wilmer on up to Athalmer as the water was more than two feet deep in places on the road from the hill below the town to the Landing and the warehouses along the river are surrounded by water.

The women and children who went on the excursion last Saturday had to be driven through this water on a wagon to reach the boat and it was a weird sight to behold them returning at midnight.

Now, all this could have been avoided simply by scraping away about six inches of earth from the river bank to the slough, a distance of a few hundred yards and sufficiently wide to let the steamer through. As it is Capt. Armstrong nearly succeeded in an attempt to force the Ptarmigan over it Saturday, and if the water continues to rise he may yet succeed.

On different occasions reference has been made to the fact in these columns that Dominion Engineer Keefer said that it would cost only \$750 to open the old channel below the hill to the Wilmer Landing and that he would have it done—he said that about three years ago, but it has not been accomplished.

Now Wilmer is up against just what has been predicted so often, and our sister towns give us the horse laugh. Well, that is all right and don't hurt much. But then this is the time to kick; so let everybody use both feet.

Windermere Rifle Shoot.

Appended are the scores made on the Windermere Rifle Association range at the last two shoots. The first three columns of figures represents the shoot on Saturday, the 6th inst., when a heavy wind was blowing; and the other three columns those of last Saturday:

Dissolution.

A Victoria despatch says the British Columbia Legislature would be dissolved on the 16th. The reason given for the delay is that the half-yearly renewal of liquor licenses took place on the 15th. Applicants must be on the voters' list and if the House were dissolved before that date without machinery for at once getting the prospective applicants on the list these men would be disqualified. By deferring dissolution till the 16th, application could be made on the 15th for licenses on the old lists. The elections will likely be held in September or October.

The excursion given by Capt. Armstrong on the steamer Ptarmigan for the school children of Windermere district last Saturday was fairly attended and all were delighted with their trip.

School Articles.

No doubt you'll find it surprising the number of things that must be bought before Harry's or Mary's school equipment is complete. Tablets, Pencils, Sponges, Copy Books, Erasers, Pencil Sharpeners, Rules, Ink, Crayons, Pens, Penholders, etc.

Yes, there's lots to buy, but sometimes you don't notice it much, especially when you are able to buy at close prices.

I have a splendid stock of school supplies and while they are a No. 1, yet I am not asking the earth for them. My prices are real low. It will pay you to buy these goods from me.

"Please, Teacher, may I go over to Mr. Yates' for a pencil?"

C. R. YATES, Chemist & Druggist
